Relevant Experience

Middle Frontend Engineer • **Saigon Technology** Mar 2022 - Present

Saigon Technology is a Vietnam-based software outsourcing company specializing in custom software, web, mobile app development, and offshore software outsourcing.

Split Payments App Mar 2024 - Present

- Participated in building the checkout flow and contributed to developing and optimizing KYC and IVR flows.
- Analyzed and improved conversion rates (CR) and service request (SR) metrics, reducing drop-off rates.
- Developed a NewRelic logging service for debugging production issues and order drops.
- Added features to the admin panel for managing orders, merchants, and configurations.

Data & Content Visualization Feb 2022 - Feb 2023

- Transformed Figma designs into dynamic, visually engaging presentation templates.
- Collaborated closely with PMs and cross-functional teams to optimize the development process.
- Enhanced UX to boost customer conversions, attract investors, and drive product sales.
- Conducted code reviews and provided feedback to team members.

Junior Frontend Engineer • **EDUBAO** Aug 2020 - Jan 2022

EDUBAO supports international students, particularly in Germany, by providing financial planning, visa assistance, insurance, and resources for a smooth academic journey.

- Translated Figma designs into reusable UI components and documented them in Storybook.
- Evaluated Gatsby vs. Next.js for SEO, speed, and efficiency.
- Built a near real-time Elasticsearch search service for personalized university and program recommendations.
- Created Squidex data models to deliver structured content across web and mobile platforms.
- Developed dashboards for customer and booking management.
- Implemented Google Analytics and Tag Manager for goal tracking, user flow analysis, and bounce rate insights.

Fresher Full Stack Engineer (Part-time) • **Labian Labs** Jul 2017 - Dec 2019

Labian Labs is a multimedia technology startup in Vietnam, specializing in developing web and mobile applications tailored for effective English language learning.

- Contributed to developing an English-learning web app for local users by implementing user-friendly interfaces, integrating interactive lessons with short videos, managing user profiles, and ensuring smooth backend functionality for progress tracking and content delivery.
